Premium Plant Policy

OUR CUSTOMERS HAVE
THIS DEFINITE ASSURANCE:

All plants produced and made ready for sale by the Joseph F. Martin Company, whether field grown or out of pots, are without a single exception, finely developed, heavy material, that will give maximum results in the first season after planting.

The fact that many items are offered both out of pots and field grown, and some only out of pots or field grown, may be confusing. There is good reason in every instance, and this is borne out by many years of experience in the preparation of perennial plants for our critical customers. In ALL CASES the best plant for shipping and transplanting is the one that is listed. Where either pot plants or field grown will give good success, both are listed. This is part of the carefully weighed reasoning behind each item in this book.

. . . Selected Novelty and New

SELECTED . . . at the Joseph F. Martin Co. means that each item has had a comprehensive test in the trials as well as a taste of the market in which it has its utility. Only after they pass 100% in every consideration are they marked 'READY TO GO' and presented to you in the special list. Each is a really valuable addition to the perennial field and will prove itself to you as it has to us. Each item is a proven MONEY MAKER.

AJUGA PINK SPIRE

This is a very effective variety because of its soft pink flowers which are produced on long spikes in June and July. Perfect, compact habit of growth, height 6 to 9 inches. Ideal for growing in shady corners. In addition to the pure pink flowers, the foliage is dense and remains evergreen throughout the entire winter.

2 1/4" Pots, Per 10, \$2.00; Per 100, \$15.00

ALYSSUM SAXATILE FL. PL.

Similar to the well known variety Saxatile Compactum, except that these flowers are double. Due to the fact that this variety produces double flowers, it is more showy and the individual flower spikes are larger. In every way we consider the double flowering form a great improvement over the old fashioned type.

Field Grown, Per 10, \$2.00; Per 100, \$15.00
4" Pots, Per 10, \$2.00; Per 100, \$15.00
2" Pots, Per 10, \$1.50; Per 100, \$10.00

ANTHEMIS MOONLIGHT

This is a fine plant for the border, growing about 2 1/2 feet tall. Throughout the summer the plants are literally covered with hundreds of pale yellow daisy-like flowers, 2 1/2 inches in diameter, which are excellent for cutting.

3" Pots, Per 10, \$2.00; Per 100, \$15.00

ARABIS ROSABELLA

Here is a plant that deserves your special attention. We believe this is the King of all Arabis introduced to date. It is a neat, upright grower, producing bright rosy pink flowers in large clusters well above the contrasting, dense, silvery gray, solid compact Arabis foliage. Creates a very striking effect.

Field Grown, Per 10, \$2.00; Per 100, \$15.00
3" Pots, Per 10, \$1.50; Per 100, \$10.00

BOLTONIA SNOWBANK

A most striking variety. Compact in habit, growing to a height of 4 feet and requires no staking. Produces an abundance of beautiful snow white flowers on strong erect stems in September and October; in a mass planting it creates an effect of a bank of snow from the ground up.

2 1/2" Pots, Per 10, \$3.00; Per 100, \$25.00

BUDDLEIA ROYAL PURPLE

The reddest of them all. Color is a rich glowing purple approaching red and is such a distinctive shade that it defies good description. See page 56.

2" Pots, Per 10, \$3.00; Per 100, \$25.00

See page 56 for detailed descriptions of new outstanding florist Buddleias.

2 1/2" Pots, Per 10, \$2.00; Per 100, \$15.00

LITTLE PINK LADY. Medium dwarf grower, height about 14 inches. Produces fine pink flowers, which due to their pleasing shade, blend very nicely with other flowers in the garden.

2" Pots, Per 10, \$2.00; Per 100, \$15.00

DIANTHUS LITTLE JOE

Easily the most interesting of the recent Dianthus introductions and bound to be your most profitable item in this line. It is about 3" high with blue spiny foliage; single, deep crimson flowers almost as large as a fifty cent piece. The best feature about it, however, is that it blooms heavily and continually from spring until killed by heavy frost. It is also disease resistant.

2 1/2" Pots, Per 10, \$2.00; Per 100, \$15.00

GEUM DOLLY NORTH

A very prolific bloomer producing rich orange colored flowers on stems 18 to 24 inches in length. It is a solid, compact grower in habit. The individual flowers are a little smaller but the effect is gained by the great profusion of bloom. The flowers are ideal for use in small or medium sized vases.

2 1/2" Pots, Per 10, \$2.00; Per 100, \$15.00

MULBERRY. Here is a real new color in Hardy Asters. The flowers are a real mulberry red. This is a good strong growing variety, producing exceptionally heavy clusters of flowers. A very worthy addition to the now up-to-date list of Hardy Asters. Height 3 to 4 feet.

2" Pots, Per 10, \$2.00; Per 100, \$15.00

ROYAL BLUE. A deep blue in color which to date has been lacking in the assortment of Hardy Asters. Produces very showy, large flowers in myriads. Height 3 1/2 feet.

2" Pots, Per 10, \$2.00; Per 100, \$15.00

ROYAL PINK. One of the best and a most prolific bloomer, literally smothered with bright pink flowers. We recommend this variety to be included in your assortment of better Hardy Asters.

2" Pots, Per 10, \$2.00; Per 100, \$15.00

MOUNT RAINIER. A rare and beautiful novelty. Straight, upright grower, producing fine quality pure white flowers in September and October. Grows to a height of 4 to 5 feet.

2" Pots, Per 10, \$2.00; Per 100, \$15.00

STRAWBERRIES & CREAM. An outstanding novelty. When the flowers first open they appear as a deep pink and these with the softer pink open flowers makes a lovely combination of color. Grows to a height of 4 ft. and blooms the end of September.

2 1/2" Pots, Per 10, \$2.00; Per 100, \$15.00

DIANTHUS SILVER MINE

This variety is similar in habit of growth to Beatrix, except that it produces pure white flowers on 8 to 10 inch erect stems. The deep green foliage is very attractive during the entire growing season. It is a prolific bloomer. We consider it a very worthy addition to the set of Beatrix and Prince Bismark. Without question it is one of the most striking recent introductions.

2 1/2" Pots, Per 10, \$2.00; Per 100, \$15.00

GEUM RED WINGS

Very free flowering variety, producing brilliant strawberry-red flowers with yellow anthers, now bringing a red into the Hardy Geum family. SAPONARIA OFFICINALIS DOUBLE

Among all of the new perennials that have been introduced over the recent years this is one of the most outstanding for cutting purposes. Grows to a height of 18 to 20 inches and stands on sturdy, erect stems, produces great, symmetrical masses of fragrant double, pure white flowers from the first of July until cut down by severe frosts. Light frosts do no damage whatsoever. September and October nights serve to bring about a light flesh pink tint that is most attractive. The first flowers, appearing in June and July, vary from light pink to white. If these are cut, the plants will continue producing flowers throughout the entire summer, bearing an exceptionally heavy crop in the month of September. At that time, due to the cooler nights, the flowers come a very good shade of pink. These are very neat in appearance and when used in floral pieces they really create a very high class effect.

Here's What Tom Evans Does

Well Known, Progressive Cleveland Florist Works With Perennials

Here's What Tom Evans Says

Dear Mr. Martin:

Sept. 15th, 1940

I'd like to compliment you on the very good quality and variety of perennials you are growing.

I find they add distinction to our summer arrangements and are the cause of much comment from our customers.

I thought you would like to know that we appreciate well grown, quality perennials blooming when greenhouse flowers are scarce, and that we use them continuously in our best designs.

You are doing a most commendable job, and your offerings are an added asset to the florist who wants to do a better business.

Sincerely,

Tom W. Evans, Pres. Florists Ass'n. of Greater Cleveland,
District Representative Florists Telegraph Delivery Ass'n.

↑
The above basket—a representative example of the Evans' artistry — was made with Buddleias Dubonnet and Orchid Beauty, Helianthus Loddon Gold, Tritoma Pfitzeri, Delphinium Martin's Superb Wrexham, and Gypsophila Flamingo. While this basket was being prepared for his display, it so effectively captivated a customer that it was sold for \$8.50 as soon as it was finished.

A nominal investment in a substantial planting of cut flower perennials will produce for many years fine quality flowers for many nicely priced floral pieces such as the one above.

ARMERIA

Sea Pink or Thrift

Attractive plants that will succeed in any soil. The beautiful evergreen tufts of bright green are always ornamental, from which innumerable flowers appear in dense heads on stiff wiry stems 9 to 18 inches in length. They flower more or less continuously from early spring until late fall. As a class they are very useful in the rockery and the taller varieties are very good for summer cut flowers or for forcing during the winter months.

BEE'S RUBY. June flower beds offer nothing more striking. This Armeria grows to a height of 18 to 24 inches. On the tip of each stem are produced bright red flowers about 2 inches in diameter. In addition to garden value, the flowers are also very attractive in floral designs. We have a nice supply ready for shipment this spring. If you are looking for something unusual here is a plant worthy of your consideration.

Field Grown, Per 10, \$2.00; Per 100, \$15.00

CEPHALOTES RUBRA. In the assortment of dwarf and semi-dwarf varieties this by far is the most outstanding. The flowers are of good size and the color is a striking red. For border there is nothing that will make such a bright showing. At road side sale grounds, these plants when in flower, will sell themselves.

Per 10, \$1.50; Per 100, \$10.00

MARTIN'S OWN HYBRIDS. For some time there has been an active demand for a mixture of bright colors in Armeria. While the strains available up to now have been composed mostly of the light shades, this new strain gives us the shades of bright pinks, coral red, light red, violet and purple which have been lacking. The numerous flowers are large and ball shaped, borne on strong, 16 inch upright stems, excellent for cutting, besides making a gay splash of color in the flower garden. We highly recommend this strain of Hybrids.

1941 Presents

*Three New Hardy
Chrysanthemum Introductions*

AVAILABLE FOR THE FIRST TIME

We are indeed happy to announce our affiliation with **Mr. Alex Cuming** of Bristol, Conn., famed originator of Hardy Chrysanthemums. This fortunate arrangement shall enable us to bring New Chrysanthemums to our customers at wholesale in the **first year** of their introduction, where formerly these highly prized new items have been available only through very restricted retail channels.

EUGENE A. WANDER

A big, brilliant, glistening golden yellow beauty, flowering so freely that the stocky growing plant is almost obscured by its branching clusters of big double flowers—each one the height of perfection in form. Plant seldom exceeds eighteen inches and is in full flower by September 20th--therefore valuable where earliness is important. It is a hardy, easily grown variety, requiring no pinching or special handling to produce flowers 4½ to 5 inches across or larger if disbudded. Fine also for pot culture. Occasional plants assume bronzy-yellow tints, but are just as attractive.

2" Pots

Per 10, \$3.00; Per 100, \$27.00

**MRS. PIERRE S.
DUPONT III**

The quality of iridescence is so pronounced in this fine new Hardy Chrysanthemum that accurate description is difficult. The dominant shade is a soft peach tinted with rosy-salmon and fawn shades; the whole overcast with an indescribably luminous sheen. It is entirely distinct and altogether lovely. The large, full, perfectly formed flowers are carried on tall branching stems, making a strong, sturdy, 2½ ft. plant. In full flower in early October, it will prove a grand addition to the garden and an invaluable cut flower variety.

2" Pots

Per 10, \$3.00; Per 100, \$27.00

MILKY WAY

This is outstanding among all white Hardy Chrysanthemums; first for the remarkable intensity of its milky white color in the open flower; again for its rich dark green foliage which contrasts so effectively with the soft lemon tints of the opening flower, creating an effect distinctly different from that of any other white variety. Blossoms are of the semi-double informal type, with broad overlapping petals and are carried in branchy sprays of 5 to 6. Unusually hardy as a plant, the open flower is remarkably frost resistant—a valuable trait where early frosts may injure the opening flower, particularly on white kinds. A strong vigorous plant 2½ to 3 feet in height, flowering in late September.

2" Pots, Per 10, \$2.00; Per 100, \$17.00

AN IMPORTANT CONSIDERATION IN THE SELECTION OF YOUR JAPANESE IRIS

For many years the trade throughout the country has recognized the unparalleled excellence of our Japanese Iris list, and the fine quality of our plants. This year again, the list is the best that can be had in Japanese Iris. Extremely important is the fact that we have been favored with the best possible weather and soil conditions for their perfect development. The most technical growing culture could not do for them what nature did in this past growing season. The Iris which we offer are not to be confused with over-aged, run-out material, much of which is being unloaded on the market at the present time. All of our Japanese Iris are without exception, young, vital, vigorous stock of a generous size, and will give you an abundance of flower the first season after planting—the perfect results which you have come to expect from Japanese Iris prepared for you by the Joseph F. Martin Co.

WHY JAPANESE IRIS ? ? ?

In the scope of the last few years, many of our tradesman friends, in casual conversation with us, have expressed some wonder at the extensive plantings of Japanese Iris which are in our nurseries. "Why," they asked, "the great attention to this plant family? What is the reason behind the row upon row of Japanese Iris that we find here? What is the value that prompts this great effort?" It has always given us a great deal of pleasure to discuss this with them, and we've found that we were able to impart information that was of value and which would prove profitable to these men in the employment of this beautiful, useful plant in their work.

With us, the romance of the Japanese Iris has its beginning in the infancy of our business, when, as a plant fanciers hobby, we made purchase of 25 plants each of our good varieties for our own enjoyment. In a few years we had increased our quantities of these four varieties. During their flowering season, visitors to our establishment insisted on purchasing whatever we could spare and continuously urged us to grow larger quantities and expand our list.

We then began to contact the outstanding growers of Japanese Iris, always insisting on the better varieties. We would often buy as many as 25 new varieties, soon discovering duplications and discarding inferior ones. We added only those which in our opinion were worth propagating and growing. We are continuing this same system today. That is why we believe that we have growing here in our nurseries the largest plantings of Japanese Iris in cultivation today, consisting of the most worthwhile assortment of varieties.

We carefully disseminated our stock to the trade in all its branches. Everywhere, those who try them report tremendous success and envision the possibilities of good profit in their turnover. This feeling and spirit has grown into a fine department of our business, and each year sees the sale of upwards of a half million rhizomes—repeated year after year this can mean only one thing — that our customers are realizing a good profit from the sale of the Iris that we grow for them.

Here is why they are successful:

FOR THE LANDSCAPER — nothing equals their beauty for planting around small lakes and fish ponds, and for livening up a well rounded-out perennial planting.

FOR THE NURSERYMAN — they are fast becoming leaders in the assortment of perennials. They are easily grown and always provide the nurseryman with good profits.

FOR THE RETAIL CATALOGUER — they outsell most of the items offered in a retail catalog and provide better than ordinary profits.

FOR THE ROADSIDE STAND — People calling at stands are asking for Japanese Iris. This is a very worthy item and sufficient quantities of the best varieties should always be kept on hand.

FOR THE FLORIST — In recent years the florist trade has fast been discovering that Japanese Iris can be cut in bud, allowed to open in water and in this manner become ideal for use in the better types of large floral arrangements. They are particularly adapted for baskets that are sent to openings.

Oriental Poppies - Hardest and Most Popular

The varieties we are listing are the most popular in our wholesale trade. We are growing these in large quantities and are in a position to offer our production to you at reasonable prices. Our field grown Poppies were transplanted from 2 to 3 inch pots last spring and they have developed into strong, field grown roots. Those we offer from pots were potted in July of last year. They are thoroughly established and are in excellent condition for planting to your fields this spring. For best results we recommend that you make a planting of Oriental Poppies as early as possible in the spring.

AZALEA SCHLIPPENBACHI

The photograph above represents a three year field plant of our Azalea Schlippenbachi. Our soil and climatic conditions are ideal for the production of this plant.

In addition to its silvery rose flowers in early spring, the deep green foliage during the summer months is strikingly ornamental, turning to a deep bronze during the autumn months, harmonizing with the fall atmosphere.

Evergreen Shrubs

We are growing the following Azaleas, Rhododendrons, etc. in open nursery rows. They are fully acclimated to sunshine and general weather conditions. This type of plant will give you better results than collected material. Please note our reasonable prices which include balling and burlapping.

A NEW IDEA!!!

SALIX PURPUREA NANA

The Blue-Foliaged Arctic Willow

New in 1940, Popularity and Demand in 1941

This is without question the most beautiful dwarf hedge that has been introduced to the American trade. Dwarf, compact habit, maximum 24 inches, can be trimmed to any desired height. Originally introduced from the far north, it became easily acclimatized, always maintaining its thorough hardiness. It grows anywhere, whether the soil be wet and heavy or poor and dry. Where other plants perish, these will flourish. It's just the plant for the difficult location, for edging along walks and beds in any soil and any position. It is newly popular among landscapers for hedging or for planting as a single specimen in a rockery or naturalization. You can be sure that it is a different idea, and that your use of it in your landscape projects will at once have the stamp of originality and distinctiveness.

THE NEWEST AND FINEST

B U D D L E I A S

Wonders Have Been Worked That Are Here To Stay

Our 2" pot plants, planted out in April or May will produce a good crop of fine quality flowers on beautifully developed bushes from July until frost.

ROYAL PURPLE

THE REDDEST OF THEM ALL

Color is a rich, glowing purple, approaching red and is such a distinctive shade that it defies good description. Even the color camera has failed to record it as it exactly is. Each large panicle seems to be lighted from within, an effect that a printer cannot reproduce. The bush is completely covered with long, sturdy spikes from July to frost. Long in pace with the good, new Buddleias, as they are introduced, our customers all know that we brought this whole list to them in the first years of introduction and that they have all enjoyed a tremendous acceptance and popularity. We've given Royal Purple the same rigid appraisal as is our habit, and we find it PERFECT in any consideration. Naturally, the supply is very limited, but we will continue filling your orders while the stock lasts—you have our word backed by our reputation that what you will have growing is the cream of the crop.

2" Pots, Per 10, \$3.00; Per 100, \$25.00

DUBONNET

The color is an exact counterpart of the French wine, Dubonnet, a beautiful new shade. In sunshine and under lights it glows almost red. The spikes are solid and well rounded, the florets large. Growth is robust and erect, stems are strong. The real beauty of its use is the ease with which it harmonizes with other flowers of all shades.

2 yr. Field Grown, Per 10, \$2.50; Per 100, \$20.00

2" Pot Plants, Per 10, \$1.75; Per 100, \$12.50

ORCHID BEAUTY

A splendid new variety of soft cattleya-lilac with a brilliant orange eye. It is near the well known Fortune in color but is twice the plant in any consideration. Flower spikes are twice as long and are brilliantly in flower from the very tip to the base at the SAME TIME. It is an extremely valuable addition to the Buddleia line.

2" Pots, Per 10, \$2.50; Per 100, \$20.00

PINK CHARMING

DISTINCTLY DIFFERENT

A striking plant anywhere, flowering from the middle of June until frost. Plant grows to 5 or 6 feet in height and spread. Heads are round and solid, and open full length. Flowers are a clear lavender pink, a different color in the Buddleia range. In the sun they appear clear pink, and under lights a soft pink. It blends beautifully with light blue in floral work. No Buddleia planting is complete without a representative planting of this beautiful pink variety.
